Protective Services

Facilities and Equipment

The police headquarters of General Trias is located in Barangay Bagumbayan. The station has 89 personnel equipped with 4 vehicles. There is also a sub-station located in 5 different barangays equipped with a total of 6 vehicles. Table 1 and Public Safety and Protective Services Map show other facilities under police protection services.

From the 2018 projected population and the total number of police personnel that sums up to 120 translates to a police-to-population ratio of 1:3,054. Thus, the current police-to-population ratio falls short to the minimum standard ratio of 1:1,000. This implies that the City of General Trias require additional personnel and facilities to cater the protective service needs of the residents.

Fire protection services, on the other hand, is being provided by the General Trias Fire Department located in Barangay Sampalucan whereas the fire protection headquarters is located in Barangay Bagumbayan and the sub-station at Barangay Manggahan. Services are being carried out with the use of a three (3) fire trucks, two (2) units of transceiver radio, one (1) VHF radio and one (1) UHF Radio, and 1,082 fire hydrants installed at strategic areas by barangay (see Table 1).

Using the 2018 projected population, the current ratio of fire personnel-to-population is at 1:16,658 which does not meet the minimum standard of 1:2,000. These data entail the need for adequate fire services in City of General Trias.

Table 1. Fire Protection Manpower, Facilities, and Equipment, 2018

Description	Actual Inventory/Total
Ratio of fire service men per person	1:16,658
Total number of firemen	5 Female and 17 Male BFP Personnel
Existing no. of fire facilities, communication equipment, etc.	3 firetrucks, 2 Units trans receiver radio, 1 VHF, 1 UHF
Number and location of existing fire department/s	1 in Barangay Sampalucan
Fire incidents for the past three (3) years	141

Note: The population data used in the computation of fire personnel-to-population ratio was based on the 2018 projected population.

Source: Bureau of Fire – City of General Trias

Under Section 13-C. of RA 9514, also known as the "Fire Code of the Philippines of 2008", it is stated that: "The BFP shall determine the optimal number of equipment, including, but not limited to, fire trucks and fire hydrants, required by every local government unit for the proper delivery of fire protection services in its jurisdiction."

The information provided for the number of fire hydrants in the city in 2018 is based on the approved subdivision waterline layout plan that totaled to a number of 1,082 fire hydrants. However, in 2020, an actual survey was conducted to verify and geotagged the existing number on site of the hydrants as listed and mapped in Table 2 and Fire Hydrants Map, respectively. It summed up to a total of 698 fire hydrants in the site, where 611 are fire hydrants and 87 are stand pipe. In Población, 3 out of 10 barangays have fire hydrants in the area located at Bagumbayan (2), San Gabriel (1), and Vibora (1) at a total of four.

Moreover, the susceptibility to hazard of each protective services facility is indicated in Table 3, where all are high susceptible to ground shaking. Area that is low susceptible to landslide is the police sub-station at Barangay Pasong Kawayan II. Also, low susceptible to flood and liquefaction are areas in Barangay Bagumbayan where police and fire protective facilities are located, whereas Barangay Bacao II is low susceptible to flood and moderately susceptible to liquefaction.

Barangay Security Force and Volunteers by Type of Service

All barangays in the city employ barangay-level police called tanod and volunteers who perform specific tasks in ensuring peace and order. The number of servicing barangay tanod and equipment is summarized in Table 4.

The tasks of Barangay Tanod's generally involve regular roving within the barangay; assisting day care students; coordination with and assisting barangay officials in the prevention of crimes and in promotion of public safety; reporting to concerned barangay officials of any crime incidence, fire incidence, public disturbance and other untoward incidents; assisting police in some judicial activities; detecting and monitoring of possible fire hazards and suspicious persons or activities; and assisting in control of road traffic.

Fire Incidence

From 2016 to 2018, a total of 141 fire incidences in the City of General Trias have been recorded. However, there is no detailed data of all these occurrences except for the 24 cases presented in Table 5 which were mostly caused by electrical failure.

Table 5. Fire Incidences and Causes in City of General Trias, 2015-2018

Crime Incidence

Crime incidence is categorized into two (2) – index or non-index crimes. Index crimes according to the Philippine National Police (PNP), are crimes against persons and property which include murder, homicide, physical injury, robbery, theft, rape, cattle rustling, and carnapping. On the other hand, non-index crimes refer to all other illegal acts such as violation of special laws or local ordinances, gambling, use of illegal drugs, illegal logging, and illegal possession of firearms.

From 2016 to 2018, crime incidence in the City of General Trias sums up to a total of 2,191 reported cases, wherein a larger percentage of 55.41% are comprised of non-index crimes. For the past three (3) years, the highest number of crime incidence was recorded in 2016 with a total of 862 cases as illustrated in Table 6. Since then, the total crimes reported gradually decrease in the succeeding years. From 2016 to 2018, the total cases reported decreased by 34.22 percent.

Table 6. Crime Incidence per 100,000 population, 2016-2018

Year	Total	Index Crimes	Non-index Crimes
2016	862	408	454
2017	762	380	382
2018	567	189	378
Total	2,191	977	1,214

Source: Philippine National Police - City of General Trias

The Philippine National Police (PNP) provided a separate record of crime incidence by barangay wherein the sex of offender is identified (see Table 9). However, there are some unreported cases, hence these records do not necessarily equate to the total number of crime incidence in the preceding table. Among all barangays, Barangay San Francisco had the largest number of crimes reported in 2018 with a total of 226 cases. This is followed by Barangay Pasong Kawayan II which had a total of 78. It is also remarkable that the barangays Gov. Ferrer and 1896th have little to no crime incidences for the past two years. It is noticeable that while Barangays San Francisco and Manggahan hold the location of some existing police and jail facilities they also have the highest number of crime incidence.

The BJMP Jail is the largest jail facility in General Trias. It has a total lot area of 6,400 sq.m which houses 428 inmates as of 2018. In all four (4) jail facilities identified in Table 7, it is noticeable that the inmate population is constantly increasing since 2015. In BJMP Jail, the total number of inmates almost doubled from 2015 to 2018.

Table 7. Jail Facilities, by Location and Inmate Population, 2015-2018

Type of Jail	L 4	Lot Area	Inmate Population						
Facility	Location	(sq.m)	2015	2016	2017	2018

On the other hand, between year 2017 to 2019, 6 out of 33 barangays in the City received drug-free clearance, namely: Alingaro, Bagumbayan, Dulong Bayan, Governor Ferrer, Prinza and Vibora as shown in Table 8.

Current and Projected Requirements for Personnel

Based on the personnel inventory presented in Table 3, the sizes of policemen and firemen are inadequate. Having 120 policemen and 22 firemen in 2018 which translates to police-to-population ratio of 1:3,054, and firemen-to-population ratio of 1:16,658 fall short to the minimum standard. Derive from the minimum standard ratio for police-to-population ratio (1:1,000) and firemen-to-population ratio (1:2,000), the city has a current shortage of 366 policemen and 221 firemen in 2021.

To achieve the minimum standard requirement, the city needs at least 961 policemen and 481 firemen by 2030 as shown in Table 10.

Similarly, to policemen and firemen, the jail guard personnel are also insufficient. Showing 1:39 jail guard-to-jail inmates that is way below the minimum standard of one (1) jail personnel per 7 jail inmates. Hence, using the minimum standard ratio, the city has a shortage of 389 jail guards in 2021. Therefore, with the projected 15,764 jail inmate population in 2030, the total required number of jail personnel in 2030 is 2,252.

On the other hand, assuming that the current need in 2021 for all personnel is already address, the demand at the end of the planning period for police force, fire force and jail guard are 475, 238, and 1,844, respectively.

Table 10. Current and Projected Requirement for Police, Fire, and Jail Personnel, 2022-2030

Туре	Existing No.	Current Need	Tot	al Require	d Number	r of Perso	nnel per Y	ear
.,,,,,	(2018)	(2021)	2022	2023	2024	2025	2026	2030
Projected Population		486,052	524,314	565,587	610,109	658,136	709,943	961,294
Police Force	120	366	524	566	610	658	710	961
Fire Force	22	221	262	283	305	329	355	481
Projected Jail Inmates	738	2,857	4,072	5,361	6,711	8,115	9,566	15,764
Jail Personnel	19	389	582	766	959	1,159	1,367	2,252

Notes: Projected Jail Inmates based on General Trias population rate per annum at 0.23205. Projection based on DHSUD Guideline: (a) 1:1,000 police-to-population ratio, (b) 1:2,000 firemen-to-population ratio, (c) 1:7 jail guard-to-jail inmate population ratio.
